

# Intertidal Scavenger Hunt

- A member of each “Fab Four” phyla  
(one mollusk, one arthropod, one cnidarian, and one echinoderm)
- Epiphytic algae
- Two different kinds of bivalves (hinged shells)
- Three different colors of macroalgae (seaweed)
- A colony of organisms living together
- A piece of a vascular plant (not algae!)
- Evidence of death
- Something that could be a home for a creature
- An organism attached to a rock by threads
- An example of one organism using another
- A shell of an organism that has one foot
- Three unique smells
- Something that changes
- Three clues that humans have influenced the beach
- Something you think other groups haven’t found
